

Oracle Office Fitout

Project

Formula was contracted to deliver a highly detailed, world class fitout for leading international leading technology company, Oracle.

The fitout included reception area, client meeting areas and client lounge, workplace accommodation comprising open workstations, enclosed offices, meeting spaces, utility areas, a computer room and a staff kitchen and social hub. The work also included the supply and installation of base building elements such as all floor finishes to the existing bare concrete floor slab and the supply and installation of a suspended ceiling throughout.

Additionally, Formula provided highly detailed ceilings and feature lighting, custom joinery, all engineered services in particular communication and IT, secure server room and a complex AV package.

Formula committed to completing the project within the clients strict construction programme, working through the Christmas holiday period in order to meet the clients PC deadline
