

QUT Gardens Point

LIBRARY – LEVEL 5

Project

Immediately proving a success with students, Formula proudly worked alongside QUT and Vabasis Architects to refurbish Level 5 of the Gardens Point campus library.

The project was completed in two stages ensuring students had uninterrupted use of the space. Formula carefully relocated reference books and shelving to a specially configured zone allowing access to necessary resources for the duration of the works.

Existing amenities were reconfigured to include a new PWD facility and fully refurbished male and female amenities. A varied array of student spaces were constructed, including glazed office style meeting rooms, freestanding 'pods' bound in custom timber panelling and booth meeting areas. The new spaces are complimented with automated lighting and the latest AV and data systems.

Address

Gardens Point Campus, George Street, Brisbane

Size

1,200m²

Duration

12 Weeks

Design

Vabasis
